Directorate of Intelligence

## Office of Information Resources

30 August 1988

NOTE TO: Executive Director

STATROM:

Director of Information Resources

1.   The proposed response was coordinated with the Deputy Director of OIT.

2.   We do not feel there is a need for a senior level review (Director of DIA and the DDCI or yourself) at this juncture. However, should DIA raise any issues, I'm sure the IC Staff will call for a review. The most likely response from DIA will be to raise again the issue of inadequate funds for the DIA program in FY89 (CIA will give DIA $3.2M) and to make a case for additional NFIP funds for DIA SAFE STATn FY90.

MEMORANDUM FOR: Director, Intelligence Community Staff

FROM: James H. Taylor
Executive Director

SUBJECT: Support for the Analyst's File
Environment (SAFE)

REFERENCE: Your Memo (ICS 7611-88) dtd 22 August 1988,
Same Subject

    1. The CIA is very pleased with the progress that has
been made in the transition from joint SAFE development to
separate agency activities. A CIA SAFE software baseline
has been established, separate contracts with the vendors
have been effected, and the system is now managed by the
Program Management Division in the Office of Information
Resources.

    2. The CIA Office of Information Technology will
continue to support the DIA SAFE program through the
Consolidated SAFE Program Office (CSPO) as outlined in the
revised SAFE directive and transition plan. The remaining
software delivery essential to both the CIA and the DIA
systems is on schedule. We continue to review the program
status with DIA and the CSPO on a monthly basis and, at this
time, have no issues or agenda items to propose for a
semiannual review.
